

What it means to be "SanCap Safe"

We are committed to using industry-approved sanitation, hygiene, and infection control practices to ensure the safety and well-being of our visitors, residents, and staff on our islands.

How you can be **SanCap Safe**

+ Wash your hands often

Wash your hands with soap and water for **at least 20 seconds**. If soap and water are not readily available, use a hand sanitizer that contains **at least 60% alcohol**. Cover all surfaces of your hands and rub them together until they feel dry.
Avoid touching your eyes, nose, and mouth with unwashed hands.

+ Avoid Close Contact

Stay **at least 6ft apart** from others while inside and outside. Do not gather in groups. Keeping distance from others is especially important for people who are at **higher risk** of getting very sick.

+ Wear a Mask

We highly recommend **wearing a mask** while you are out in public both inside or outside where social distancing isn't possible.
Your mask should cover your mouth and nose.
A mask is not a substitute for social distancing.

+ Cover your coughs and sneezes

If you are in a private setting and do not have on your cloth face covering, remember to always **cover your mouth and nose with a tissue** when you cough or sneeze or use the inside of your elbow. Throw used tissues in the trash. Immediately wash your hands with soap and water for **at least 20 seconds**. If soap and water are not readily available, clean your hands with a hand sanitizer that contains **at least 60% alcohol**.
